REFERENCE	Porosa EG1

MINIMUM RECYCLED CONTENT PER TON OF PRODUCT

48%

The composition for the reference Porosa EG1 includes a percentage of recycled material content, including recycled water and mineral raw materials of 48%. The period of time considered for this calculation covers from 10/01/2022 to 31/03/2023.

a) Recycled residual water content of pre-consumption of internal and external origin.

b) Content of recycled solid matter of pre-consumption of internal and external origin.

Total water content (kg)	**538**
Total solids content (kg)	**1.010**
New water content (kg)	**0**
Recycled residual water content (kg)	**538**
Virgin solid matter content (kg)	**798**
Pre-consumer recycled solid matter content (kg)	**212**
RECYCLED CONTENT (%)	**48 %**

REDUCED USE OF RESOURCES

21%

Material reduction

100%

Water reduction

87%

Energy reduction

Reduction of material resources (%)	**21 %**
Reduction of water resources (%)	**100 %**
Reduction of energy resources (%)	**87 %**

The content of this Environmental Product Self-Declaration and the automatic calculation methodology comply with the requirements established in the UNE-EN ISO 14021 standard and have been verified by the Ceramic Technology Institute on Rev.1.
